## **Parcelle '88**

edited by  
G. Wolf · T. Legendi  
U. Schendel

**Band 48**

**AKADEMIE-VERLAG BERLIN**

(OCR-Scan der Proceedings 1988)

Herausgeber:

Dr. Gottfried Wolf  
Akademie der Wissenschaften der DDR  
Zentralinstitut für Kybernetik und Informationsprozesse, Berlin

Dr. Tamás Legendi  
Hungarian Academy of Sciences  
Research Group on Automata Theory, Szeged

Prof. Dr. Udo Schendel  
Freie Universität Berlin  
Institut für Mathematik III, Berlin (West)

Die Titel dieser Schriftenreihe werden vom Originalmanuskript der  
Autoren reproduziert,

ISBN 3-05-500656-9  
ISSN 0138-3019

Erschienen im Akademie Verlag Berlin, DDR-1086 Berlin, Leipziger Str.3-4

(C) Akademie-Verlag Berlin 1988  
Lizenznummer 202.100/503/88

Printed in the German Democratic Republic

Gesamtherstellung VEB Kongreß- und Werbedruck,  
9273 Oberlungwitz  
Lektor: Dr. Reinhard Höppner  
LSV 1095  
Bestellnummer: 763 961 0 (2182/48)  
05000

## TABLE OF CONTENTS

---

### INVITED PAPERS

W. Händler (Erlangen) Multiprocessor arrays: Topology, efficiency and fault-tolerance	15
V. Aladyev, A. Krasnoproshina, V. Kryschanovskii (Tallinn, Kiev) Unsolved theoretical problems in homogeneous structures	33
A. Albrecht (Berlin) On simultaneous realizations of Boolean functions, with applications	51
O.L. Bandman, S.V. Piskunov (Novosibirsk) Parallel microprogramming as a tool for multi-microprocessor systems	57
F. Dehne, J.R. Sack (Ottawa) A survey of parallel computational geometry algorithms	73
M. Gössel, V.V. Kaversnev, B. Rebel (Berlin) Parallel memories for straight line and rectangle access	89
C. Jesshope, P. Miller, J. Yantchev (Southampton) Programming with active data	111
P. Kacsuk (Budapest) Prolog implementations for cellular architectures	131
V.E. Kotov (Novosibirsk) . . . ‘ Modular highly-parallel computation and architectures	147
U. Schendel (Berlin-West) Parallel computation and supercomputers and applications	157
P.G. Spirakis (Patras) Fast parallel algorithms and the complexity of parallelism (Basic issues and recent advances)	177
L. Uhr (Madison) Process-structured architectures to transform information flowing through	191

R. Vollmar (Braunschweig)  
Basic research for cellular processing 205

W. Wilhelmi (Berlin)  
Parallel algorithms in image processing 223

### SUBMITTED PAPERS

V. Beiu (Bucharest)  
VLSI arrays implementing parallel line-drawing algorithms 241

R. Creutzburg (Berlin)  
Parallel conflict-free optimal access to complete extended  
q-ary trees 248

D.J. Evans, G.M. Megson (Loughborough)  
Systolic preconditioning algorithms for the Jacobi iterative  
solution of sparse linear systems 256

G. Fritsch, J. Volkert (Erlangen)  
Multiprocessor systems for large numerical applications 266

M.A. Frumkin (Moscow)  
Systolic array for eigenvalue of Jacobi matrix 274

E. Katona (Szeged)  
A transitive closure algorithm for a 16-state cellprocessor 285

E. Körner, H. Gross, A. Richter, H. Shimizu (Ilmenau, Tokyo)  
Control of sensory processing - a hypothesis on and simulation  
of the architecture of an elementary cortical processor 291

H. Kunde (Munich)  
Bounds for l-selection and related problems on grids of  
processors 298

Ch. Meinel, P. Zienicke (Berlin)  
Recursive design of communication schemes for parallel  
computation with RELACS 308

K. Palagyi (Szeged)  
Solution of dense systems of linear equations using  
cellular processors 311

N. Petkov (Berlin) Running order statistics on a bit-level systolic array	317
R. Pöschel, F. Wächter, F. Börner (Berlin) Realization of sets of permutations by permutation networks	326
T. Pöschel, H. Ebeling, T. Boseniuk (Berlin) Simulation of learning networks	332
H. Schmeck, A. Dittrich (Kiel) Given's rotation on an instruction systolic array	340
T. Tensi (Munich) Worst case analysis for reducing algorithms on instruction systolic arrays with simple instruction sets	347
N. Toth (Szeged) Self-checking processing elements in cellular arrays	353
R. Trobec (Ljubljana) Cellular diagnostic in parallel systems	360
D. Uhlig (Mittweida) Reliable networks for Boolean functions with small complexity	366
K.-H. Zimmermann (Bayreuth) Pipeline-automata - a model for acyclic systolic systems	372
